Question 18

$$\stackrel{\textstyle\frown}{mBC} = m \angle BOC$$

$$\begin{array}{l} \text{m } \angle BOC = 115 \\ 360 \text{ - m } \stackrel{\frown}{BC} = m \stackrel{\frown}{BAC} \\ \text{m } \stackrel{\frown}{BAC} = 360 - 115 \\ \text{m } \stackrel{\frown}{BAC} = 245 \end{array}$$

(1)
